

Apple HomeKit technology provides an easy, secure way to control your home's lights, doors, thermostats, and more from your iPhone, iPad, or iPod touch. The Polypipe SmartHub responds to Siri, letting you request the current temperature, set a new temperature or temperature hold and turn on/turn off standby directly from your iPhone, iPad, or iPod touch.

**Compatibility**  
The Polypipe SmartHub enables the Polypipe SmartStat, SmartStat RF & SmartPlug to work with HomeKit technology. See [www.polypipeufh.com](http://www.polypipeufh.com) for more details.  
To control this HomeKit-enabled accessory, iOS 9.3.2 or later is recommended.  
Controlling this HomeKit-enabled accessory automatically and away from home requires an Apple TV with tvOS 10.0 or later or an iPad with iOS 10.0 or later set up as a home hub. Communication between the Polypipe SmartHub and Polypipe SmartStat, SmartStat RF & SmartPlug is secured by utilising frame-protection mechanism based on Advanced Encryption Standard (AES) with 128-bit randomly generated keys.  
Communication between iPhone, iPad, or iPod touch and the HomeKit-enabled Polypipe SmartHub is secured by HomeKit technology.  
Use of the Works with Apple HomeKit logo means that an electronic accessory has been designed to connect specifically to iPod touch, iPhone, or iPad, respectively, and has been certified by the developer to meet Apple performance standards. Apple is not responsible for the operation of this device or its compliance with safety and regulatory standards.  
Apple, iPad, iPad Air, iPhone, and iPod touch are trademarks of Apple Inc., registered in the U.S. and other countries. HomeKit is a trademark of Apple Inc. Apple and the Apple logo are trademarks of Apple Inc., registered in the U.S. and other countries. App Store is a service mark of Apple Inc., registered in the U.S. and other countries.

# Polypipe

## Underfloor Heating

## SmartHub

**3 Add Location**  
Once registered & signed in, select **ADD LOCATION**

**2 Download Application**  
Connect your mobile device to the same Wi-Fi network as your SmartHub. Download the FREE Polypipe Smart App and register your account.

**1 Connect Power**  
Connect the SmartHub to your router with the Ethernet cable provided.  
Connect the power supply to the SmartHub. The router will automatically assign an IP address to the SmartHub. The Link LED will light up RED once the SmartHub has connected to your network. Once connected to the cloud server, the Link LED will turn GREEN.

**! Setting up your SmartHub**  
The SmartHub is designed to be quick and simple to setup.  
You will soon have total control over your home heating system.  
Just follow this quick start set up sequence and:  

- An active broadband connection.
- 230V mains supply (Adaptor supplied).
- A broadband router with DHCP function.
- A mobile device running iOS or Android operating system.

### System Requirements

#### 4 Connect To SmartHub

Press the connect button on the SmartHub to add the Location to your Account.

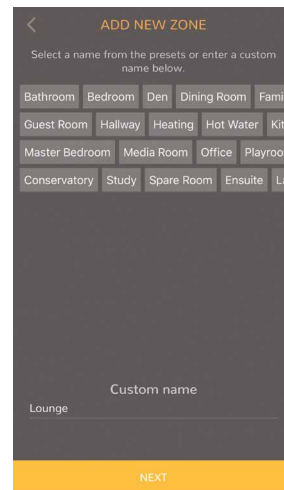

#### 5 Name Your SmartHub

When successfully connected, add a title for the new location (e.g. Home). The next step is to join SmartStat's to the SmartHub. Select **ADD ZONE** in the App.

#### 6 Add Zone

Select from a preset title or enter your own custom title for the SmartStat, then press **NEXT**.

#### 7 Pairing mode active

- 1 Use the **</>** keys to select **PAIR**, then press & hold **✓** to turn off the display.
- 2 **SETUP** is now highlighted, press the **✓** key twice to pair to the SmartHub, the **WiFi** symbol will flash.
- 3 Once the SmartStat successfully connects to the SmartHub the **WiFi** symbol is permanently displayed.

#### 8 Add Another/Finish

When complete, press **ADD ANOTHER** for any additional zones on the network or press **FINISH** to complete setup.

#### 1. Pair your Polypipe SmartHub to HomeKit with the Polypipe Smart App

From the settings screen, select HomeKit & Siri.

If no HomeKit homes have been created Select **CREATE A NEW HOME**

Enter a title for your home.  
Tap on the right arrow to enter the home.  
Select **ADD NEW ACCESSORY**

The app will now scan for compatible HomeKit devices.

Select **Polypipe Smart Hub**, scan the HomeKit setup code on your Smart Hub with the camera on your iOS device.

Your Smart Hub is now successfully paired to HomeKit!

#### 2. Assign your devices to rooms.

The next steps in the app are to sort all attached devices paired to the SmartHub into your HomeKit rooms.

At the same time, you can edit the service names of the attached devices.

Rename the service as you would like to refer to it via Siri voice control, and assign it to the relevant room.

Repeat this process for all of your devices.

Once you have done this select **FINISH SETUP**

#### 3. Create automations, share control and configure other HomeKit enabled devices.

Learn how to set HomeKit automations, use Siri voice control, add users and configure other Apple devices with the iOS10 Home app - visit: [www.apple.com/uk/ios/home](http://www.apple.com/uk/ios/home)
